

HOW TO MAKE MONEY WITH PHOENIX

Understanding Phoenix

The Legend of the Phoenix -

At the end of its life-cycle the phoenix builds itself a nest of cinnamon twigs that it then ignites; both nest and bird burn fiercely and are reduced to ashes, from which a new, young phoenix arises.

The bird was also said to regenerate when hurt or wounded by a foe, thus being almost immortal and invincible -- a symbol of fire and divinity.

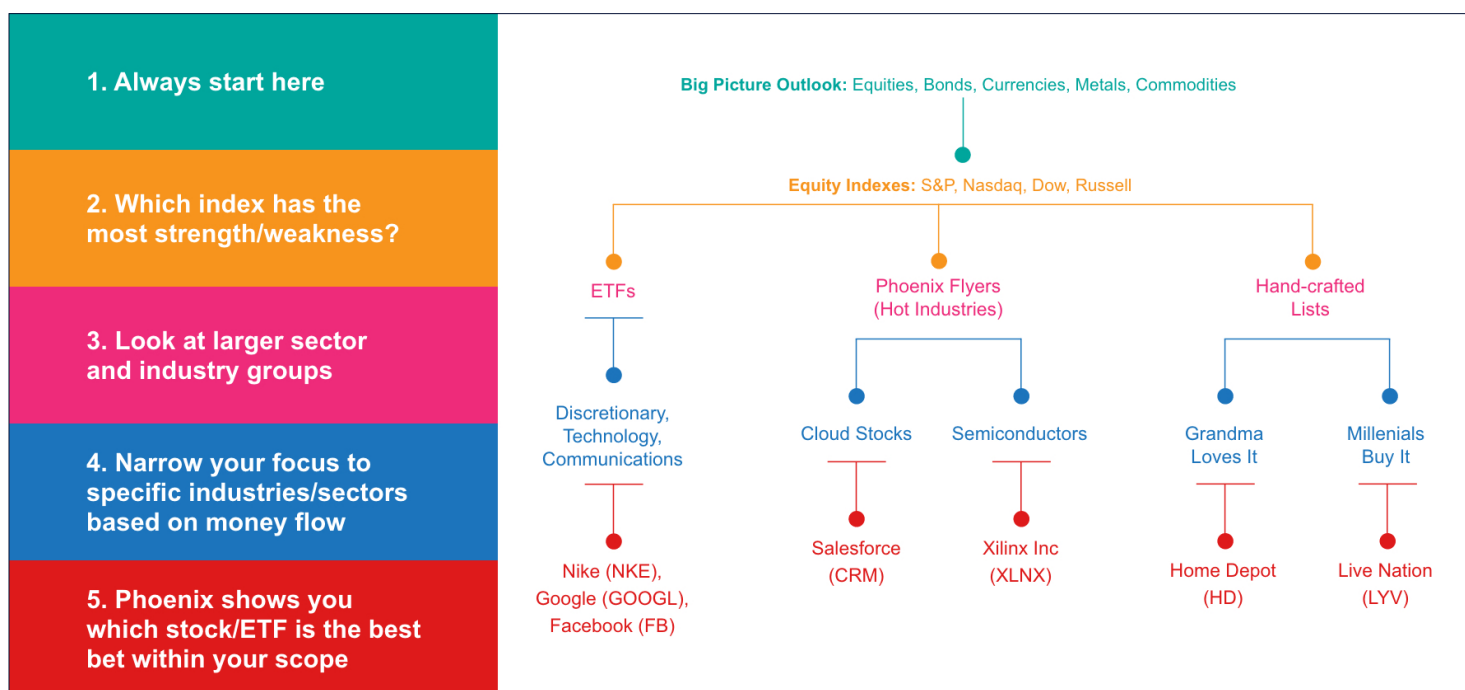

How can a stock be a Phoenix?

In the stock market, there are always stronger stocks than others. The strongest of the bunch, that can withstand market pressures, show themselves as Phoenixes.

When does Phoenix Fly?

The best time to find Phoenix is after a turning point in the market. Whenever there is a pullback, the stocks that 'rise from ashes' the quickest with the most strength behind them, are the best bets. These stocks become easy to spot - after the fact, but Phoenix helps you find them before it's obvious. This is how you get your edge.
